High Shear pump series SFP2 & SFP3

Characteristics

High shear pump with open or closed impeller and patented stator for high flow and pressure. The shear is generated between the rotor and an innovative and optimized perforated stator. The shear can be optimized and increased by raising the speed of rotation. Shear rates up to 100.000 s-1 can be achieved at a maximum speed of 3600 rpm.

- 2 Pressed stainless steel in 2B quality plate, extremely smooth
- **3** Large seal cavity to clean mechanical seal properly
- 4 Monobloc execution with std. IEC motors
- **5** Standardized mechanical seals to EN 12756 FDA approved bellow mechanical seals or sterile O-ring seals (spring not in contact with the liquid)
- 6 2 seal diameters for the entire range: - SFP2: Ø 33 mm - SFP3: Ø 43 mm

bellow seal

sterile seal

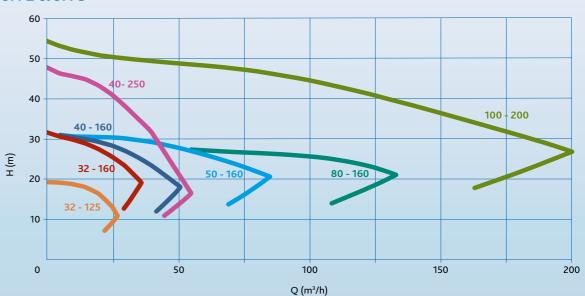

Your benefits

- Shear rates up to 100.000 s-1
- Highest efficiency on the market, energy saving
- Use of std. components
- Self pumping
- Hygienic design, so easy to clean
- Easy installation and maintenance
- Very quiet operation

Pump series	SFP2
Performance	
max. flow rate	80 m³/h
max. differential head	45 m
max. pressure	inlet: 10 bar
max. shear	100.000 s ⁻¹
max. liquid viscosity	
max. temperature	
impeller type	open
max. motor power	22 kW
max. speed	
available frequency	
Technical specifications	
materials wetted parts	
mechanical seal configuration	
available material O-ring	EPDN
connections	
surface finish	hygienic
	+ electropo
certificates & legislation	

Performance curves at 2900 rpm

SFP2 & SFP3

Application areas

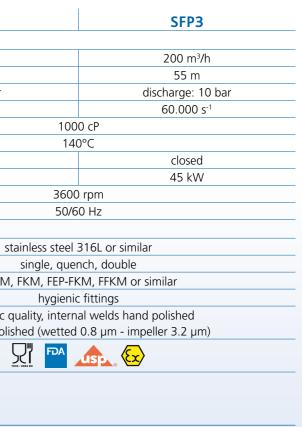

The Packo shear mixer pump is mainly used for in-line mixing, homogenisation and dispergation applications.

Mixing of two liquids:

- with a large different specific gravity,
- having a large different viscosity or
- that are difficult to mix.

Also dispersing of:

- solids in liquids and
- dispersion of gas in liquids.
