## VA-E50

### Description

The VA-E50 is an electrical driven double diaphragm pump. With the wide range of different available materials for pump body, valve seats, valve balls and diaphragms, this pump is the ideal problem solver in a wide range of applications across many industries. The VA-E50 can run in “low pulsation mode” to reduce the generated pulsations in the flow or in “transfer mode” to generate a higher flow rate.

### Your benefits

- ↘ Energy efficient
- ↘ Smoother flow in “low Pulsation Mode”
- ↘ Low noise level
- ↘ Can stall against close discharge
- ↘ Can run dry without damage
- ↘ Dry self priming
